Diego Herrera

Software Engineer

SUMMARY

Creative, detail-oriented, software engineer with a deep interest in Blockchain. Proven track record of creating and implementing successful front and back-end web applications. Looking to bring my skills to a company with global reach.

WORK EXPERIENCE Software Engineer at 100devs | Remote

December 2021 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full stack web applications
- Applied agile methodologies like SCRUM for project management

Recent Projects:

FUTMEET (Full-stack Web App) – Soccer Meetup website where users can sign up/ login, and create or join local soccer events.

Amazon Clone – Complete Amazon interface with ability to add and remove items from and into the basket while adding up the total of all the items. Login and Authentication implemented using Firebase.

Other Projects: Coin Exchange, Decentralized Exchange built with Moralis SDK,

Football-Clones, Hello World Decentralized App.

ServiceNow Intern for Rooms to Go | Valrico, FL

December 2020 — February 2021

Designed, configured, and developed baseline and custom applications to enhance the platform.

Full Stack Web Developer at Upwork | Remote

January 2022 — Present

- Created full stack web applications and static websites for different clients across small and medium size businesses.
- Created full stack web applications and static websites for different clients across small and medium size businesses.
